

S. HIMMELSTEIN & COMPANY

The World's Best Torquemeters Since 1960

Greetings!

We recently participated in the Offshore Technology Conference in Houston. We hope we answered everyone's questions at the show.

If you were unable to attend and would like to get in touch with us, request more information, or schedule a meeting, please send a note to sales@himmelstein.com.

PRODUCT INTRODUCTION!

Ultra - Precision

MCRT® 48800V & 49800V Ultra Precise Shaft Torquemeters have analog and digital inputs and the highest accuracy of any similar torquemeter. **Features include:** Capacities from 25 to 375,000 lbf-in, Output Torque, Speed & Power in Analog & Digital Form, 400% Overload and 300% Overrange, and 0.02% Combined Nonlinearity and Hyst-eresis. Contact us for more information.

Established in 1960, S. Himmelstein and Company makes the worlds best torque sensors and data acquisition systems. Company innovations have created many advances in sensor technology. We design, manufacture and test these products in Hoffman Estates, Illinois where complete machine shop, surface mount, test and engineering facilities permit control of the manufacturing process. Call us at (847) 843-3300 or visit our website!
